

Project Demo Planning

Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Team ID	SWTID-2026-7239
Team Lead	Divyadharshini R
Team Members	Hithisri V, Harini A, Manju R, Preethi V

Demo Preparation

Prepare the application locally, configure API credentials, verify the FastAPI server, prepare a sample prompt, and keep a backup screenshot/recording.

Demo Sequence

Introduction → problem → solution → input form → AI generation → comic preview → PDF export → customization → conclusion.

Sample Demo Input

Story prompt: A brave fox exploring an enchanted forest. Character name, forest setting, dramatic tone, and anime art style can be used for the first demonstration.

Alternative Demo

Change the tone to funny and art style to comic book to demonstrate customization and regeneration.

Technical Backup

Use /docs to demonstrate API endpoints if a browser-based demo is not possible.
