

Scalability & Future Plan

Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Team ID	SWTID-2026-7239
Team Lead	Divyadharshini R
Team Members	Hithisri V, Harini A, Manju R, Preethi V

Current Scope

The current version focuses on generating a single personalized comic through the complete input-to-export pipeline.

Future Enhancement 1

User profiles and account management.

Future Enhancement 2

Comic libraries for saving and revisiting generated comics.

Future Enhancement 3

Multi-page story arcs and larger comic projects.

Future Enhancement 4

Additional personalization and richer generation controls.

Scalability Direction

The modular architecture separates frontend, backend, AI generation, layout, and export, allowing individual components to be enhanced without redesigning the entire workflow.
