Stage 1 - Idea

User decides the theme or basic idea for the comic.

Stage 2 - Input

User enters Story Prompt, Main Character Name, Setting, Story Tone, and Art Style in index.html.

Stage 3 - Generation

FastAPI processes the request, Gemini Flash creates a 5-panel outline, Gemini Pro expands it into narration/dialogue, and Stable Diffusion creates panel illustrations.

Stage 4 - Preview

comic_preview.html displays panels sequentially with title, image, scene description, caption, narration, and image prompt reference.

Stage 5 - Export

The layout is assembled by layout_builder.py and exported by exporters.py using FPDF.

Stage 6 - Completion

The user is redirected to export_success.html and can create another comic.
