

Define Problem Statements

Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Team ID	SWTID-2026-7239
Team Lead	Divyadharshini R
Team Members	Hithisri V, Harini A, Manju R, Preethi V

Problem Statement

Creating a complete comic manually requires planning the storyline, characters, dialogues, scenes, visual style, and page layout. This can be time-consuming and difficult for non-artists and casual creators.

User Problem

Users may have a creative idea but lack the time or artistic skills to convert it into a complete visual comic.

Proposed Problem-Solution Direction

Provide a simple web interface where users enter a story prompt, character name, setting, tone, and art style, and the system automatically generates a personalized comic.

Expected Outcome

A complete comic experience containing a structured storyline, narration, dialogues, illustrations, preview, and downloadable PDF.
