

Proposed Solution

Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Team ID	SWTID-2026-7239
Team Lead	Divyadharshini R
Team Members	Hithisri V, Harini A, Manju R, Preethi V

Solution Overview

ComicCraft is a web application built with FastAPI. It captures user preferences, invokes Gemini models for storytelling, uses Stable Diffusion for illustrations, previews the result in a Jinja2 interface, and exports the final comic to PDF.

Generation Pipeline

1. User input → 2. Gemini Flash 5-panel outline → 3. Gemini Pro narration/dialogue → 4. Stable Diffusion illustrations → 5. Layout building → 6. Comic preview → 7. PDF export.

Personalization

The generation process uses the user's story prompt, main character name, setting, story tone, and art style.

Iteration

Users can regenerate the pipeline with different tone or art-style selections, allowing the comic to be customized toward their creative vision.
